door to european  
quality

catalogue

**Alias** has changed the typical image of armoured doors with external fast joint hinges.

ABSOLUTE is a new concept in internal hinges, designed, created and patented by ALIAS. Using a simple key it is possible to adjust ABSOLUTE hinges according to height, and towards the internal or external side.

Aesthetics, safety and resistance are the most important aspects of an armoured door. Doors are tested for approximately 50.000 openings, which is an average life of 30 years.

ALIAS supplies 2 kinds of different bolts, depending on the door. FORMAT is the traditional horizontal bolt, and C PLUS, with raking run, creates even higher security.

Laser welding assures excellent precision, with no structural deformations, and prevents any kind of oxidation or corrosion.

# Alias (Italy)

# Security Doors with Metal Frame

**ALIAS** presents 8 different models, but it is possible to personalise your armored door, by choosing from the options in every model.

**UP TO 12 LOCK-SIDE  
LOCKING POINTS**

## Steel N

This is the base model in the **ALIAS** range. It is the only model fitted with traditional external hinges, it features:

- 6 lock-side locking points
- 6 hinge-side steel fixed dowels
- double insulation
- leaf and frame galvanized structure

## Vision R

If you want more light in your house this is the right model for you, because it is a glass door supported by a solid structure, using laminated glass. In order to grant the same security as the other ALIAS models, main structure should be at least 16 cm on three sides and 20 cm for the lower crosspiece. The glass can be divided into separate boxes.

- 8 lock-side locking points
- 6 hinge-side steel fixed dowels
- double insulation
- leaf and frame galvanized structure
- internal hinges

**SINGLE AND DOUBLE CONFIGURATIONS**

The finishings for frames and lateral shapes are BLACK or can be different colours such as ALUMINIUM, WHITE or 2 wooden choices - MAHOGANY and BAY OAK.

# High Security Doors with Solid Timber Panels

## Double R

- 6 lock-side locking points
- 6 hinge-side steel fixed dowels
- double insulation
- leaf and frame galvanized structure
- timber panels
