

Doors

door to european
quality

catalogue

COFAS (San Marino) started actively in the door industry several years ago. The company has quickly reached an important position in Italian and European markets, and is now an industry leader. COFAS has a selection of over 150 models of doors, organised in 4 different series. The doors use a modular system with a reversible frame to adapt easily and stylishly to all constructions.

ALFA LUM (San Marino) manufactures doors and windows world wide, for professionals and exacting clients. ALFA LUM offers a wide range of doors and windows in various colors. The individuality of each order is characterised by differences in design and accessories. High standards of safety, service and quality are guaranteed.

SCRIGNO (Italy) is a company whose main aim is to provide solutions to the problems of saving space. Doors and windows that disappear into the frame system have been developed. In Italy "Scrigno" has become the synonym for a disappearing sliding door. The company produces more than 2000 different systems and is a leader in its sector for quality and turnover.

ALIAS (Italy) aims to satisfy the demands of clients for doors with high quality technical performance to ensure absolute security. ALIAS is a dynamic company, producing doors of innovative design. It produces a broad and diverse range of goods, and is a market leader in the security sector in Europe.

Cofas doors are made from traditional, ever-fashionable materials in classical and contemporary styles with architectural glass and various decors. Cofas produces the whole range of external and internal doors, offered in two packages:

1. Finished doors ready to install
2. Raw doors and frames.

Prices range from sophisticated architectural doors to very basic budget models.

1. Timber-Veneer doors
2. Laminated doors
3. Semi-solid timber doors
4. Solid timber doors
5. Pre-primed resistant MDF doors.

Alfa Lum (San Marino)

Timber-Veneer Doors

The **ALFA LUM** door is both visible and invisible, making the most of the open spaces in our homes. The simple operation can create comfortable and intimate surroundings. You have a door when you need one, but make it disappear when you do not. Behind this concept ALFA LUM have produced a framing system enabling doors to disappear into walls. With the ALFA LUM system, doors assume a new elegance.

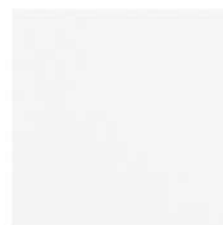

ALFA LUM doors are 40mm (44mm) thick and are grooved to receive the floor guide. They are supplied with pre-drilled holes, lock, door posts, cover profiles, sealing gaskets and dust prevention brushes. We also provide architraves with increased projection on one side for a tiled wall.

Doors are supplied to suit the standard frame sizes and in **Litoide** and **Renile** models.

SCRIGNO®

Scrigno is famous for providing sliding door systems with an integrated box built into the wall. It is a simple and functional system which enables a door in a partition wall to disappear into a metal box. Architects and Designers, who use this product in both private and public areas, can let their imaginations run wild.

The Scrigno system covers a wide range of individual products. For internal applications there are many variants on offer, to efficiently and aesthetically satisfy design fantasies. 2300 size options are available. Scrigno's major advantage is in creating spaces where none previously existed. Considering the size of today's houses this is a revolutionary step forward.

Whether it concerns an installation in small rooms, or separation of large rooms. Scrigno creates space and solves life-style problems. With opening widths from 600mm to 4800mm, the Scrigno system improves buildings, and creates surroundings in which refinement and sobriety complement the practicality and functionality of the product. It is not a matter of simply saving and optimizing the use of available space, but also of actively personalizing your home.

Only original Scrigno has a 12 year warranty! An authorized network of approved distributors support and service the Scrigno promise of reliability, recognized by the European Quality Standard UNI EN ISO 9001:2000.

Scrigno (Italy)

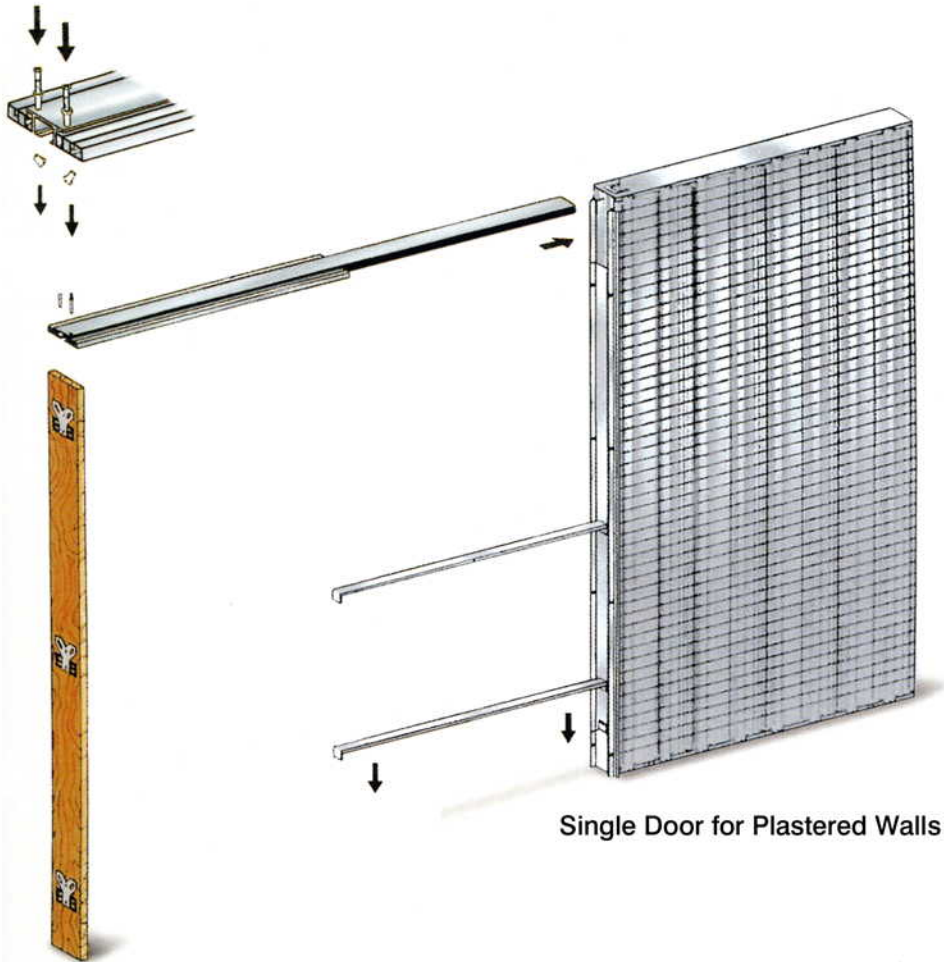

Sliding Door Systems

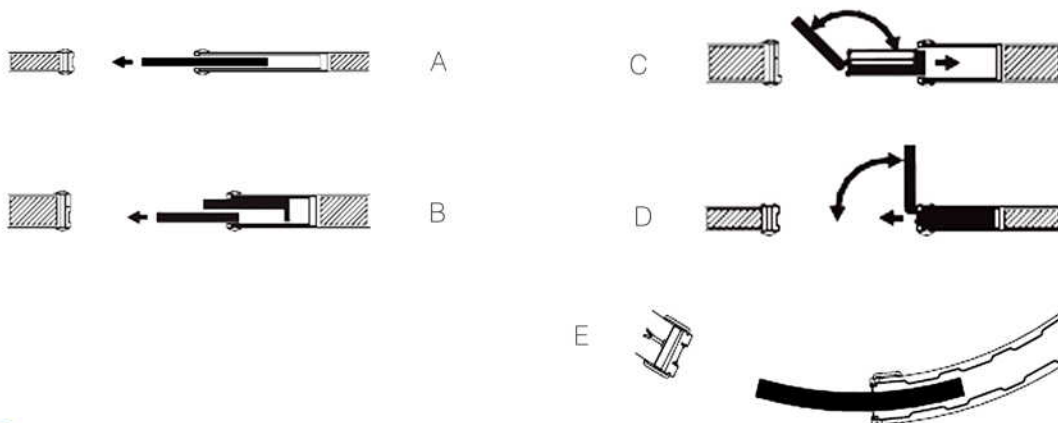

Aluminium Zinc Alloy Metal Boxes

Single Doors

- Slide the crosspiece into the fitted guide on the upper part of the metal box frame, then push it until it hooks onto the retainer spring.
- Fix the door-post sub frame to the crosspiece with the pre-fitted nails.
- Fit the spacer bars into their brackets.

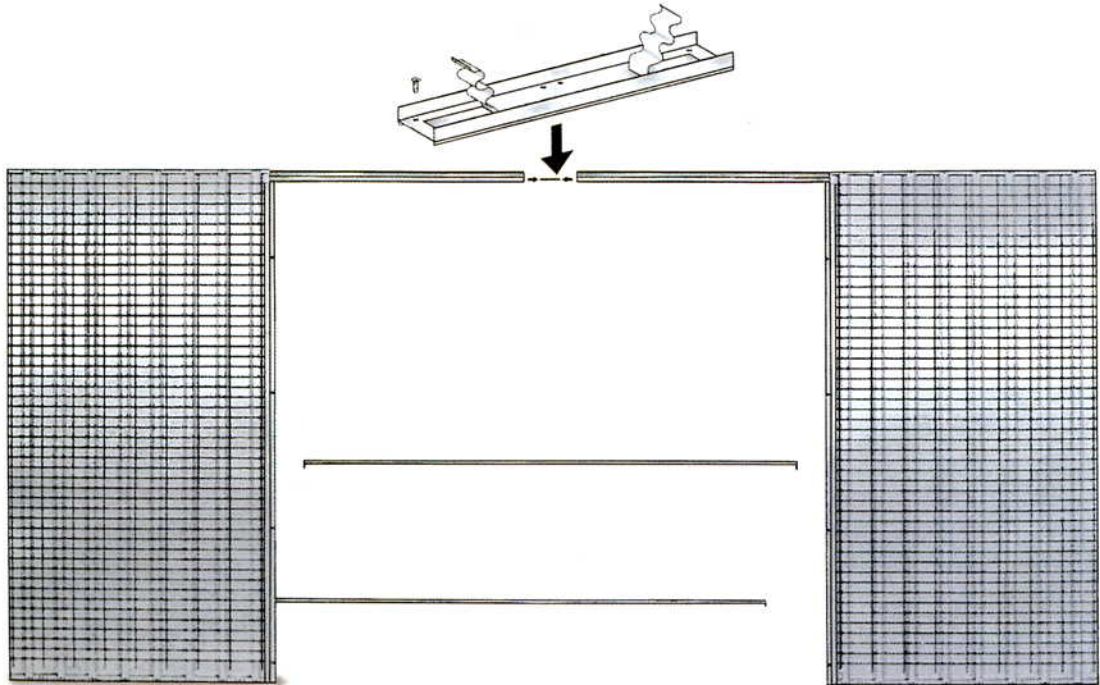

Single Box Configurations

Double Doors

Here the preparation is the same as for the single doors.

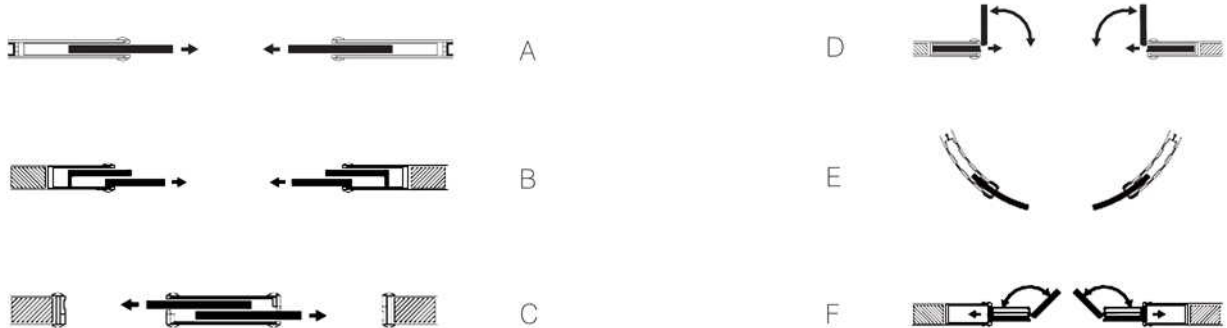

- Place the two metal box frames side by side, with the crosspieces already in position.
- Then join them together with the double door coupling.

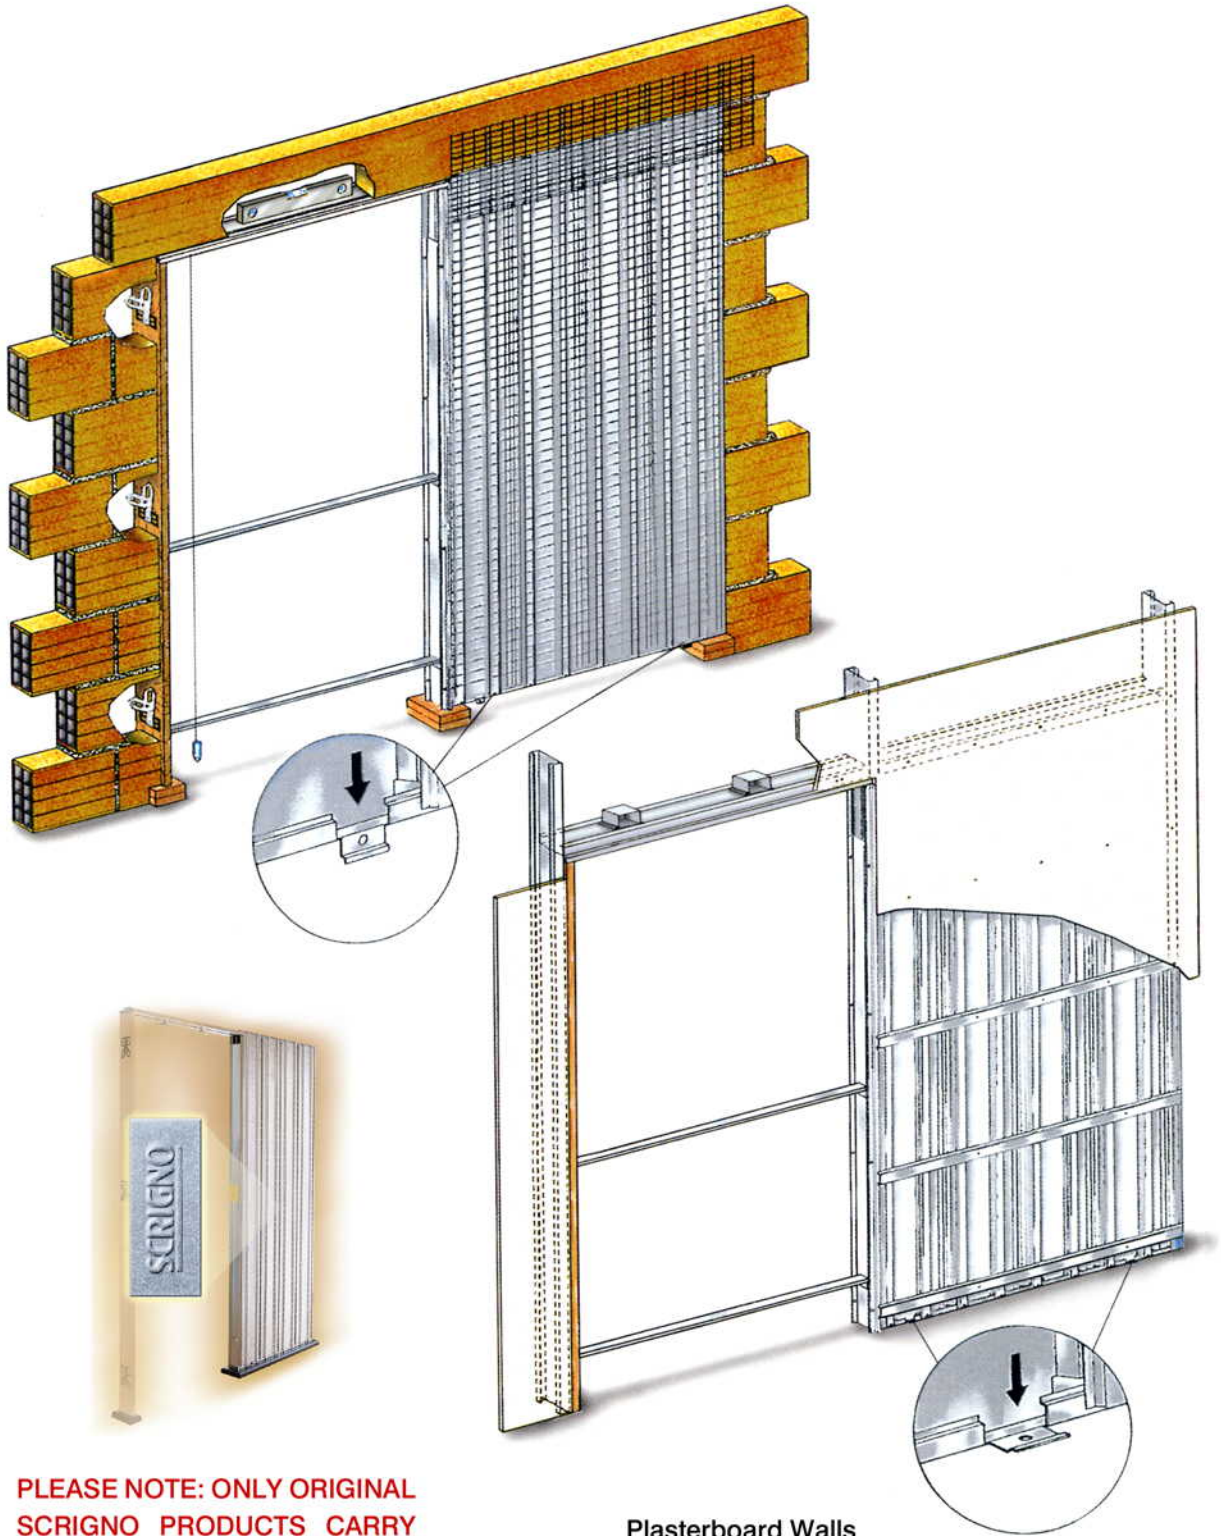

Double Door for Plastered Walls

Plaster, with the normal type of lean cement mortar is used for interior work.

Double Box Configurations

Brick and Brick-Veneer Walls

**PLEASE NOTE: ONLY ORIGINAL
SCRIGNO PRODUCTS CARRY
THE "SCRIGNO" TRADE MARK.**

Plasterboard Walls

Scigno frames can be used on plaster-board walls, 100mm or 125mm finished overall thickness.

Sliding Architectural Systems with Finished Doors

Scrigno BASE

This original product, is the starting point for the entire range of "Scrigno" products. This simple, basic model enables interiors to be re-organised thus creating space. It is ideal for saving vital spaces in such areas as kitchens, bathrooms, wardrobes and toilets. It is suitable for use in private houses and other buildings, for example restaurants and hotels. **Scrigno BASE** is the solution for your unsolved space problems.

Scrigno BASE DOUBLE

The **BASE DOUBLE** enables two adjacent rooms to be transformed into one. This is a very simple and practical solution to utilise the most of the available space in two rooms. It enables the two rooms to be used individually or separately. Two doors can easily slide into their frames, thus disappearing and creating one larger room. Typical installations would include the living/dining room.

A “simultaneous opening” kit, which operates the second door panel when only the first is being opened or closed, is available.

Scrigno GRANLUCE

Some doors designed to create a "division" but Scrigno doors unite different areas. Scrigno **GRANLUCE** was developed specifically for those who love open spaces. Housed in a single frame hidden in the wall, two overlaying doors slide effortlessly across the opening, a further example of Scrigno's ability to let spaces run wild. Scrigno Granluce for plastered walls has been designed to divide wide living spaces. The Granluce is made of two parallel sliding doors which are housed in a single box frame. The finished wall thickness is 170mm with a 134mm internal space. It is suitable for doors up to 44mm thick. It is available either in a single or double version. The opening height dimension is 2030mm, Granluce extra height version allows larger opening height dimensions from 2040mm up to 2700mm in 10mm increments. Scrigno Granluce for plastered

Scrigno PRATICO

As is implied in its name, this model is very practical. It is ideal for use in conjunction with two adjacent rooms, for example bedrooms, bathrooms or toilets. Comprising only one box frame, Scrigno **PRATICO** can house two door panels sliding in opposite directions. The system is extensive and very flexible – it even caters for doors of different sizes and styles.

The finished/plastered wall thickness is 170mm with an internal opening size of 134mm which can accommodate a 44mm thick door. In addition to the standard opening height of 2030mm, other heights from 2040mm to 2700mm can be catered for in 10mm increments. This model is not suitable for plasterboard walls.

Scrigno ESSENTIAL

Scrigno **ESSENTIAL** is a completely new framing system for internal disappearing sliding doors, harmonising perfectly with the wall which, through design, is left uncluttered. Visually and physically the wall is on its own, free of linings and posts to disturb its clean, clear lines.

The door leaf appears to be 'cut in the wall', meeting the desires of people who appreciate the original Scrigno concept of 'doors that appear and disappear'. With the new Scrigno 'Essential' framing system the wall is the most important part of the space. The door disappears completely inside the wall and appears only when required. The beauty, construction and design of the wall is there for all to see. Scrigno 'Essential' is the result of the attention to detail and technology of all Scrigno doors.

Scigno APPLAUSO

Scigno **APPLAUSO** modifies the traditional sliding door philosophy by adding the folding technology. It enables the folded doors to disappear inside a special Scigno frame. This product is suitable for applications where little space is available, like bathrooms, lockers and corridors. Applauso is available in single door and double door models with opening dimensions for the single door from 60 to 120 cm and the double door from 120 to 240 cm. It saves more space with only 40 cm needed for the frame and 10 cm for the doorpost. It is now possible for a door of 80 cm to disappear. The metal parts are included and have been developed by Scigno to ensure a perfect alignment of the doors in the closed position.

Scrigno ORBITALE

Scrigno **ORBITALE** is a new internal sliding door system, whose name indicates its main characteristic - a box frame for one or two "curved" fitted sliding doors. Orbitale is yet another way in which the architects and interior designers can free space and use their imagination, as they do with numerous other Scrigno products. It is available to suit 105 or 125mm plaster and 125mm plasterboard walls.

The product is based on five standard radii, but it is also possible to create customised versions on request. Scrigno Orbitale is a product with unique characteristics, both from a technical and constructional point of view.

QUALITAL STANDARD PACKAGE (Included in Price)

- SCRIGNO frames with fittings (Metal Box)

SUPPLIED BY REQUEST

- Finished door panel with lock and hinges
- Door cornice (architraves) for both sides

All doors and components are already finished and glazed (depending on client's choice) and ready for immediate installation.

Alias has changed the typical image of armoured doors with external fast joint hinges.

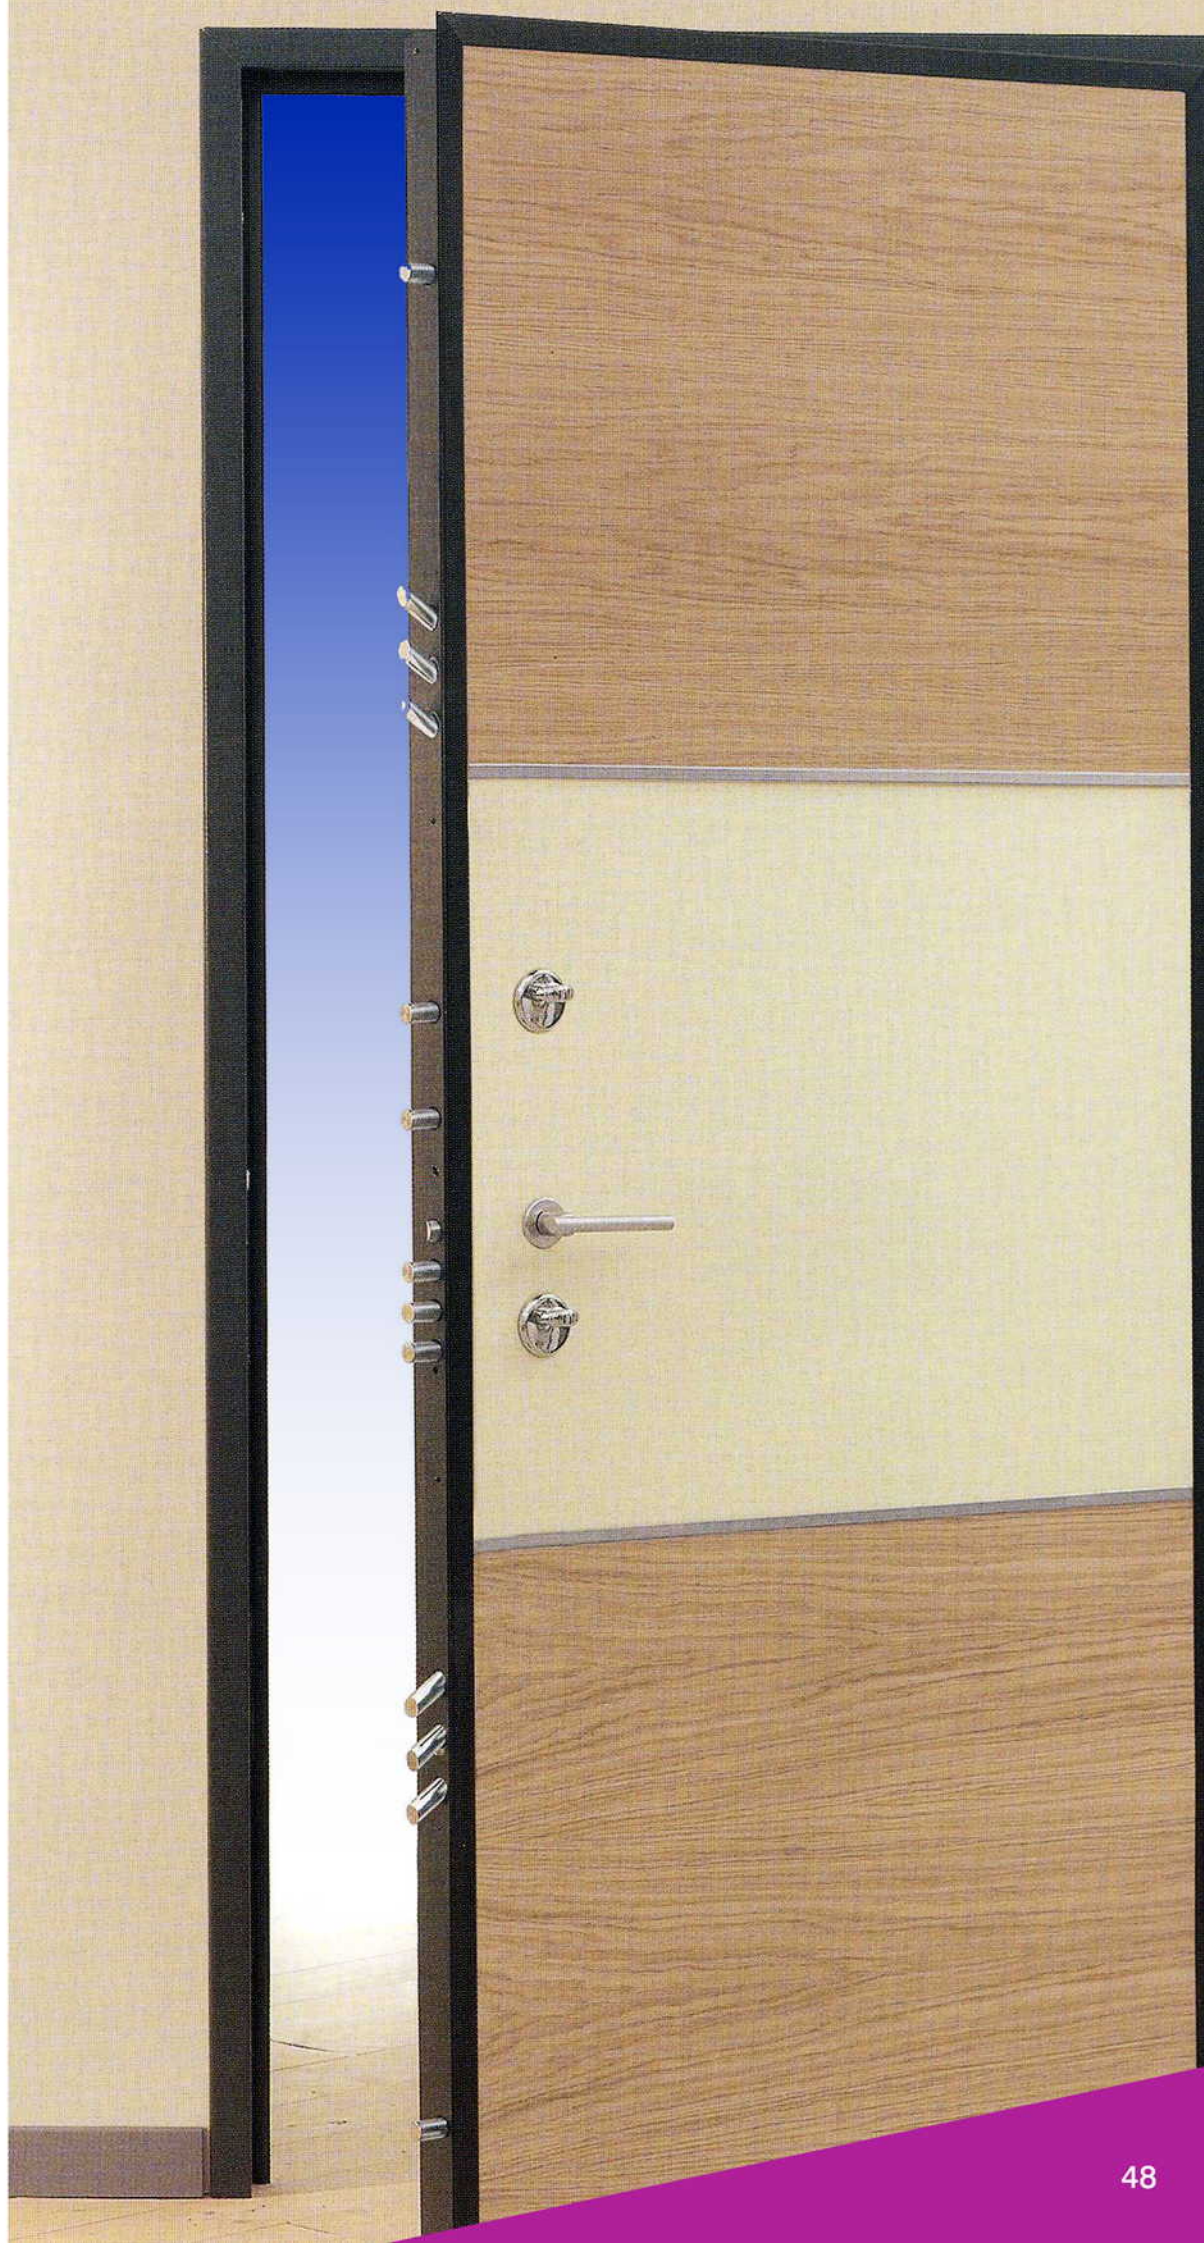

ABSOLUTE is a new concept in internal hinges, designed, created and patented by ALIAS. Using a simple key it is possible to adjust ABSOLUTE hinges according to height, and towards the internal or external side.

Aesthetics, safety and resistance are the most important aspects of an armoured door. Doors are tested for approximately 50.000 openings, which is an average life of 30 years.

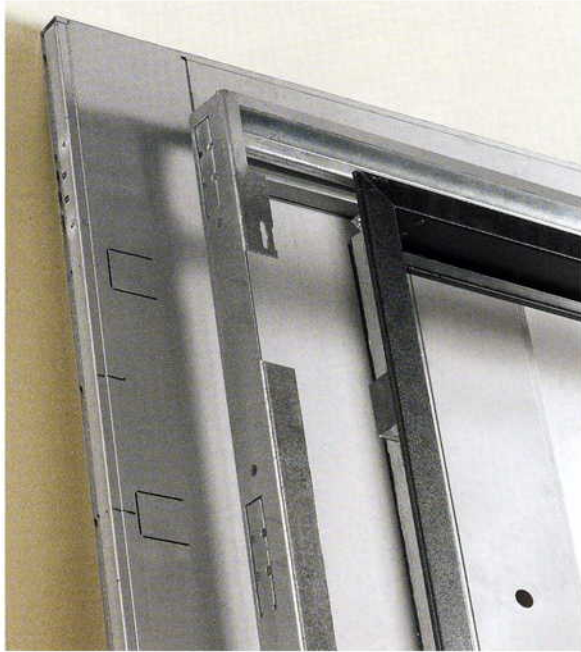

ALIAS supplies 2 kinds of different bolts, depending on the door. FORMAT is the traditional horizontal bolt, and C PLUS, with raking run, creates even higher security.

Laser welding assures excellent precision, with no structural deformations, and prevents any kind of oxidation or corrosion.

Alias (Italy)

Security Doors with Metal Frame

ALIAS presents 8 different models, but it is possible to personalise your armored door, by choosing from the options in every model.

**UP TO 12 LOCK-SIDE
LOCKING POINTS**

Steel N

This is the base model in the **ALIAS** range. It is the only model fitted with traditional external hinges, it features:

- 6 lock-side locking points
- 6 hinge-side steel fixed dowels
- double insulation
- leaf and frame galvanized structure

Vision R

If you want more light in your house this is the right model for you, because it is a glass door supported by a solid structure, using laminated glass. In order to grant the same security as the other ALIAS models, main structure should be at least 16 cm on three sides and 20 cm for the lower crosspiece. The glass can be divided into separate boxes.

- 8 lock-side locking points
- 6 hinge-side steel fixed dowels
- double insulation
- leaf and frame galvanized structure
- internal hinges

**SINGLE AND DOUBLE
CONFIGURATIONS**

The finishings for frames and lateral shapes are BLACK or can be different colours such as ALUMINIUM, WHITE or 2 wooden choices - MAHOGANY and BAY OAK.

High Security Doors with Solid Timber Panels

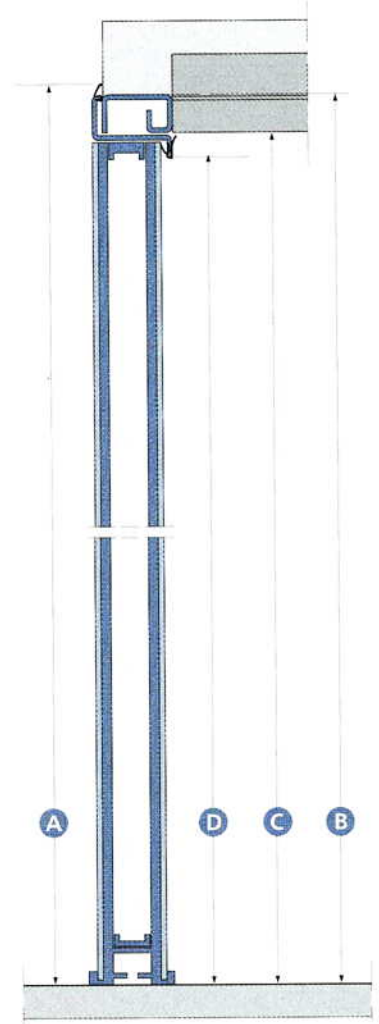

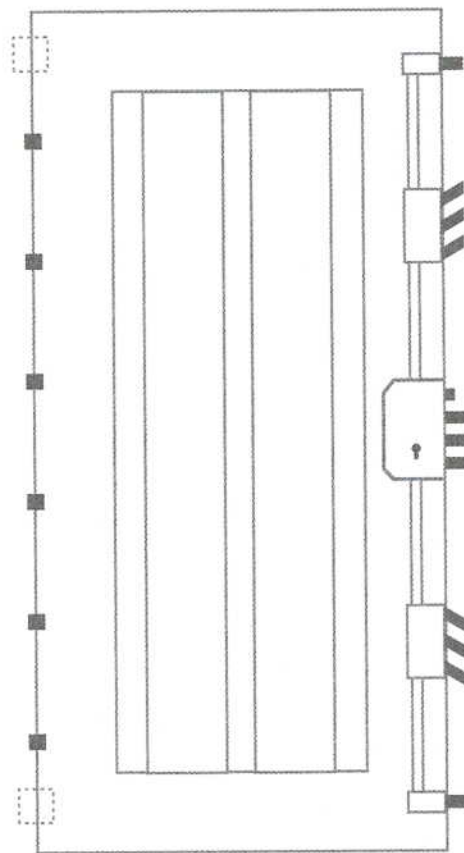

Double R

- 6 lock-side locking points
- 6 hinge-side steel fixed dowels
- double insulation
- leaf and frame galvanized structure
- timber panels

Frames Colors and Lateral Shapes

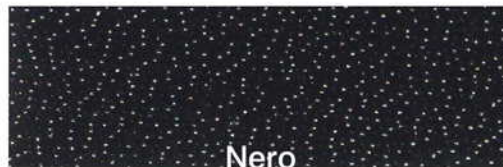

Lacquering

There are 12 unique colors in addition to the traditional RAL table to personalise your doors and make them even more beautiful.

Essences

The choice of the essences for panels is wider because ALIAS offers new finishes and models giving you more personal touch.

QUALITAL STANDARD PACKAGE (Included in Price)

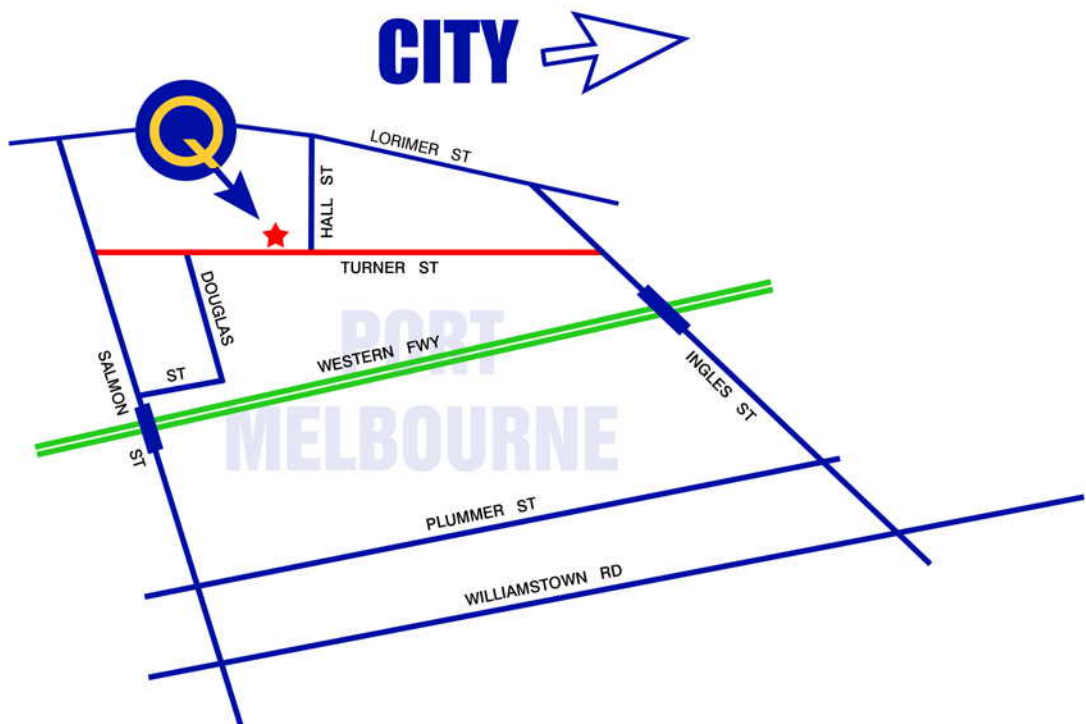

- Finished door Panel with Lock and Hinges
- Door Frame

You can get any door color by RAL or more than 60 different ranges of panels.

You can order any custom-made door in any design and size.

All doors and components are already finished and glazed (depending on client's choice) and ready for immediate installation.
