Protection with a particular ambience

**MACO
RUSTICO**

The window shutter is an identifying feature of a house – a characteristic that in many areas typifies the appearance of entire localities. For many people, it is an attractive building accessory.

The folding shutter can, however, do considerably more than just look good. It provides protection against rain, hail, sunshine, snow and cold, from inquisitive gazes and it makes life difficult for burglars.

Window shutters radiate intimacy and exude homeliness!

**MACO

Protection with a particular atmosphere!

Feel Safety Security and Sociability

It is not the appearance alone that is making the use of window shutters more popular.

The recognition of their function as a decorative,

insulating and security element is also raising their importance.

Window shutters are therefore being fitted ever

more frequently to both restored houses and new dwellings.

**MACO
RUSTICO**

**MACO-RUSTICO-Shutter fittings stands for:
secure – convenient – durable**

Window shutters must be equipped with secure and easy-to-operate fittings, which will ensure years of trouble-free operation.

MACO-RUSTICO-Shutter fittings are:

Secure

- because pivots are generally made from steel
- because the size of the brackets provides additional stability
- because special screws are fitted so that it is impossible to take the shutters apart.

Convenient

- because all operating devices are easy to get at and to use.

Durable

- because the surface is additionally coated with a special powder-paint mixture, which is water and dirt resistant.

**MACO
RUSTICO**

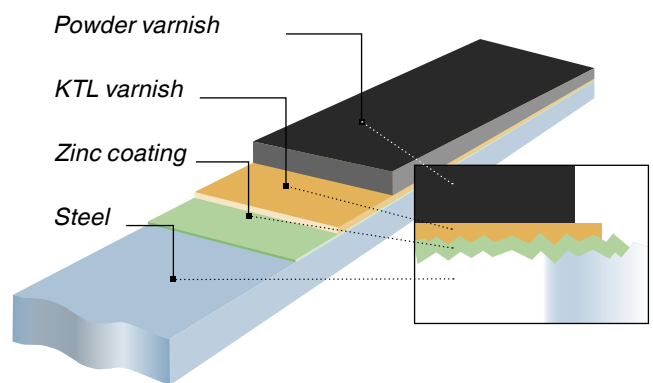

A surface that runs deep

Make-up of coating MACO-premium

- KTL varnish fills all Roughness and avoids hollowspace.

Coating MACO-premium

- 3-times better corrosion protection
- Protects against aggressive environmental influences
- Water and dirt resistant
- Friendly Procedure

Looks good with all finishes and shutter types

- In black, bronze and white.
- Environmentally friendly as no solvents are used!

Many possible uses and easy handling

Hinges for all types of shutter

- For timber, plastic and aluminium shutters.
- Solutions for mounting frames.
- Suitable for all shutter designs.
- Extra narrow brackets for low clearance between the wall and the shutter.

Solutions also for aluminium shutter fittings.

Simple and easy

Simple ...

➡ ... because shutters can be laterally adjusted retrospectively.

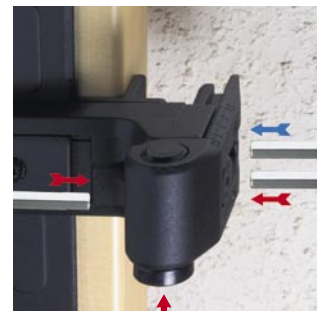

➡ ... because offset adjustment is possible with the shutter open or closed..

With a millimetre scale to aid adjustment.

Easy ...

... because the shutter is easy to hang thanks to the synthetic bush.

... because the synthetic bush prevents the pivot against corrosion. Shutters move freely for years.

Security knows no bounds

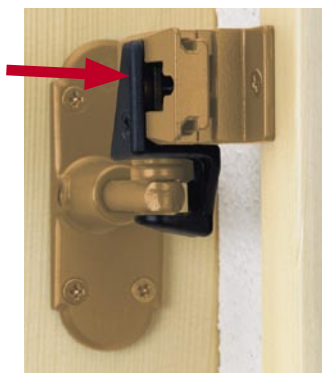

RUSTICO-Pivots

Stable and secure

- Pivots are generally made from steel.
- High stability due to 55 mm high mounting brackets.
- Pivot are screwed from the side, therefore they are inaccessible when the shutter is closed.

RUSTICO-Anti-removal device

- Can be fitted after installation.
- Safeguards the shutter in both the closed and open state (wind).
- The safety device cannot be removed in the closed state.

Additional safety screws

One-way-screw

Specially matched safety screws make removing the shutter fittings impossible by conventional means.

The „one-way screw“ cannot be removed.

Innovative solutions are what motivate us

RUSTICO-Comfort shutter stay

Easy and convenient

- No protruding parts when the shutter is open.
- Easy operation.
- Hardly visible.
- Only one size needed.
- Stable, particularly with heavy shutters.
- Can be used independently of fitting.

**Comfort shutter stay
also available for door
shutters!**

RUSTICO-„Classic“ shutter stay

Many options

- Shutter latches automatically.
- Can be adapted to any thickness of shutter.
- Four steel fitting carriers for different types of wall and insulation up to 80 mm.

Shutter stay for doors

- Shutter engages automatically when opened.

The height of convenience

RUSTICO-internally-mounted shutter opener

Convenient to use

- Shutters can be opened when the window is closed.
- Removable handle makes it safer for children.

Ideal solution for windows with fixed glazing, sliding windows or horizontally pivoted windows.

Internally-mounted shutter opener hinge

Internally-mounted shutter opener gear

RUSTICO holding latch

Child's play to use

- Shutter engages automatically when opened.
- Easily accessible and recognisable operating device.

Foto neu

Buffer stop soft

protects and spaces the shutters with 5 mm stapel-pads.
