

## OPERATING INSTRUCTIONS LIFT LEVER DOOR LOCKS

Your new door has a quality MACO door lock fitted. The lock is part of a multipoint construction operated by lever handles.

Please read the following instructions carefully to ensure the correct operation of your new door.

### TO LOCK YOUR DOOR:

1. Close the door and lift the lever handle (this will engage the locking points)

2. Turn the key or thumb turn cylinder one complete revolution.

Your door is now locked.

### TO UNLOCK YOUR DOOR:

3. Turn the key or thumbturn cylinder one complete revolution.

Your door is now unlocked

4. Depress the lever handle to disengage the locking points and open the door.

5. NOTE: The handle and the key must not be operated at the same time.
