New Turn Restrictor for Tilt Before Turn Windows

Reason: Our in-house Design team in Salzburg have developed a new turn restrictor for use on Tilt Before Turn Windows. The Restrictor is screw fitted into the slot below the cam in the corner element, thus restricting the movement of the cam into the turn position. The new restrictor is available in Silver finish only. For hard to access applications we are able to offer a plastic clip in version of this restrictor. part ref 43624

Part Number: 357081 Silver finish

Availability: Ex Stock Maco UK

Packaging: 100 per box
